PROFESSIONAL SUMMARY

I am a software developer who is interested in understanding how a system actually works and finding the purpose that it serves. This leads me to find real problems in my life and craft solutions for others, like building a meal tracking app for my wife so that she can achieve her weight goals. Understanding how a system works allows me to communicate with other team members effectively and help non-technical members understand the purpose of what we're building. I am looking for my first role where the work is impactful and feedback is fast and direct, so that I can continue to grow and deliver greater value to my team.

EXPERIENCE

Teaching Assistant — Nashville Software School

Volunteer | May 2025 - Present

- Supports students by answering questions and debugging HTML, CSS, and JavaScript in real time through CodePen

CodeCampfire AI Development Apprenticeship

Remote Software Development Program | Sep. 2025 - Jan. 2026

- Used AI tooling to accelerate development while writing architecture, reviewing generated code, and making final implementation decisions
- Submitted technical planning documentation and collaborated via Git workflows; reviewed by mentors to verify problem comprehension before implementation
- Monitored on delivery pace and code quality to distinguish between AI-assisted work and uncritical AI generation

Full Stack Web Developer

Nashville Software School | Nov. 2024 - May 2025

Intensive full-time, six months software development bootcamp focusing on Python/Django development fundamentals and problem solving. The final three months of the program being executed in a simulated company environment with SCRUM methodology.

- Project management/tracking with GitHub project boards and issue tracking
- Solution Design: white-boarding and wireframes
- Created RESTful API's with Django REST framework

Porter

Circle K | Oct. 2021 - Present

- Maintained property cleanliness resulting in our store presentation becoming the benchmark set forth for other stores within our region.
- Filed orders through vendors to keep stock levels maintained for consumer convenience to increase store sales
- Diagnosed issues with dispensers resulting in the continuation of fuel sales. Saving the company around >\$1000 in issue tickets any time that equipment goes down.
- Consistently merchandised product according to corporate specifications to appeal to consumers resulting in higher sales.

EDUCATION

Volunteer State Community College

Associate's Degree in Foreign Language

2017 - 2019

- Spanish
- French

Nashville Software School

Certificate in Web Development

2024 - 2025

Nashville Software School

Certificate in AI Tools

2025

SKILLS

- JavaScript - 4
- React - 5
- Django - 4
- NodeJS - 4
- Python - 4
- Github - 6
- HTML - 5
- SQLite - 4
- Flutter - 1
- CSS - 4
- PostgreSQL - 4
- Docker - 2

PROJECTS

Rapid Response

React | JSON Server

2024

A role based website that allows patients to learn about practitioners personally and professionally before scheduling an appointment.

- Role-based Actions
- Date Filtering
- Forms

Apartment Maintenance Tracker

TypeScript | NodeJS | Prisma

2026

A role-based website. Allows communication between apartment tenant and landlords concerning maintenance. Developed during CodeCampfire

Apprenticeship

- Implemented JWT
- Role-based Actions
- Role-based Forms
- Real-Time Messaging

Drink Management System

React | Python | Django | SQLite

2025

A full stack website meant to assist employees in calculating stock for store coolers, to streamline ordering and auditing.

- Inventory Tracking
- Planogramming

Meal Tracker

Flutter | Dart | Sqlflite

WIP

A personal health, mobile app. Tracks user-sourced food information according to user preferences

- Dietary Summary
- Dynamic UI
